DETAILED ACTION

1. Claims 36-90, 96-109, 117, 118, 123, and 124 are presented for examination.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 36-71, 77-90, 96-109, 117, 118, 123, 124 drawn to hierarchical scaling, classified in class 345, subclass 660.
- II. Claims 72-76, drawn to cutout forms and cutout images, classified in class 345, subclass 770.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions perform completely separate functions. Invention I displays items at different sizes based on temporal criteria; Invention II is directed to cutting out images and forms.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
